DETAILED ACTION

Drawings

1. Applicant is required to submit a proposed drawing correction in reply to this Office action. However, formal correction of the noted defect may be deferred until after the examiner has considered the proposed drawing correction. Failure to timely submit the proposed drawing correction will result in the abandonment of the application.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.185(a). Failure to take corrective action within the set (or extended) period will result in **ABANDONMENT** of the application.

This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-3, 5 and 7** are rejected under 35 U.S.C. 102(b) as being anticipated by Boyer (United States Patent 4,554,417).

Regarding **claims 1 and 5**, Boyer discloses a tandem adaptive echo canceller arrangement. In addition, Boyer discloses an arrangement (figure 1) for canceling echo canceling echoes supplied via the received signal (X(k)) and supplied to the received input (X), which reads on claimed "apparatus", as disclosed at column 2, lines 40-46 and exhibited in figure 1, comprising:

control unit (16), which reads on claimed "means for implementing", at the start of a communications session over input line (X) which reads on claimed "communication line", echo cancellers 10 and 12, which reads on claimed "plurality of echo cancellers", for canceling echo on input line (X), the echo cancellers each operate to cancel echoes that arrive during non overlapping 16 millisecond intervals, as disclosed at column 2, line 64 through column 3, line 12;

each of the adaptive filters (10 and 12) include an adaptive transversal filter, which reads on claimed "means for training", each canceller produces a signal estimate, which reads on claimed "cancellation signal", that cancels arriving during the 16

millisecond window associated with each of the echo cancellers, as disclosed at column 2, lines 46-63;

switch (16), which reads on claimed "means for eliminating", after a predetermined training period, the echo canceller (10 or 12), that produces a cancellation signal below a predetermined threshold, as disclosed at column 3, line 38 through column 4, line 21.

Regarding **claims 2-3 and 7**, Boyer discloses everything claimed as applied above (see claim 1), in addition claims 2-3 are interpreted and thus rejected for the reasons set forth above in the rejection of claim 1.

Allowable Subject Matter

3. ***Claims 4 and 6*** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding **claim 4**, the prior art of record failed to specifically disclose or fairly suggest allowing a user to alter the predetermined threshold via a graphical user interface.

Regarding **claim 6**, the prior art of record failed to specifically disclose or fairly suggest allowing a user to alter the predetermined threshold
